Key Points

- 1. Most things are fixed by a restart**
- 2. If going to the windows button and restart doesn't fix it, try a force shutdown (Hold down the power key for at least 10 seconds and leave off for 30 seconds to 1 minute)**
- 3. Make sure students have not downloaded unnecessary things to the computer (such as cursor extensions and backgrounds)**
- 4. Laptops need to shut down and charged nightly for the best performance.**
